9:00 a.m. - 10:00 a.m. - Program

FREE

Speaker Clinton Torp, C.M.  
Airport Director

If you are flying a Drone for Commercial reasons (such as taking photos) the FAA requires you to obtain an FAA Remote Pilot Certificate. In addition if your drone weighs between 0.55lbs and 55lbs the FAA requires all drone owners to register each Drone. Our speaker, Mr. Torp will provide education on this process. Please join us for an educational opportunity to gain the knowledge about Drones to avoid civil and criminal penalties.

In addition, this is an opportunity to check out the remodel at our Airport!

Please call the Association Office to reserve your seat for this Educational Coffee!
